

# WHAT CAN IT DO?

## BUILDING DESIGN AND MATERIALS

As a rural village we can agree what matters when it comes to new builds.

Is abiding to minimum environmental standards enough? Are the minimum standards for garden sizes fair? Can we ask for allotments and shared orchards?

## LOCAL AMENITIES

Do we ask developers to provide charging points for village use? As the population grows, what services do we need replacing and updating.

## DENSITY

Driving around the county we have all seen the disastrous builds that have been imposed on various villages, where the only concern has been profit. There are few examples of sympathetic new builds, however, planning is beginning to listen to wishes of communities as it recognizes the importance of the wellbeing of communities.

## SHARED SPACES

We can preserve and improve shared spaces, whether that is a new bus shelter or a footpath away from a road.
